WEEKLY REVIEW PROV. MARKETS

Markets as Revised by the Market
Examiner, of Calgary,
For This Paper.

BEEF—Edmonton reports that the market there has been slow this week. Choice heavy steers brought from \$4.75 to \$5.25; choice light \$5.00 to \$5.25, with good at \$4.50 to \$5.00; medium steers made from \$4.00 to \$4.50, while common offerings sold at \$3.50 to \$4.00.

FEEDERS, STOCKERS—Trading in this market is reported as having been fairly active, with feeder steers selling at \$4.00 to \$4.75; stock steers \$3.50 to \$4.50; stock cows \$2.50 to \$3.75.

HOGS—Edmonton reports that the market there was at \$10.35 for hams, select \$10.85, and butchers \$10.00, fed and watered basis.

SHEEP—Trading has been fair in the Edmonton market, but tending lower. Yearling sales were made at \$4.00 to \$4.50; ewes \$2.00 to \$4.00 and lambs easier at \$5.00 to \$6.00.

CREAM—Receipts showing a gradual decline, but the drop is a seasonal one. Prices holding steady and no immediate change expected.

POULTRY—Prices steady: No. 1 fowl over 4 lbs., 10c; No. 1 under 4 lbs., 8c; No. 2, 5c, with roosters at 5c and broilers 12c to 14c.

EGGS—Receipts continue fair, with bulk of offerings of good quality. Long holding and not weathering; fair demand for good offerings, but other grades very drab. Extras quoted at 23c; first 21c; seconds 17c.

HAY—Upland offerings continue light, but an increase noted in available supplies of timothy. Demand slow. Improvement anticipated as business as soon as harvesting is completed. Upland bringing \$12, and timothy \$17 per ton at country points.

FEED OATS—Moderate demand noticeable while receipts are inclined to be lighter. Undertone of market not very strong. Quotation of 35c prevailing.

GREENFEED—Slight improvement has been evident in offerings. Demand is active and supplies are turning over readily. No carload lot movement. Quotation of \$10 at \$12 now prevailing.

HIDES—Receipts from country light, while quality is reported as very good. Demand light. Tanners holding large leather stocks, and therefore not inclined to purchase more raw material. Prices steady.

WOOL—Bulk of clip reported to have been marketed. A few owners are still holding in anticipation of higher prices. Demand very slow. Jobbers quoting from 76c to 80c per lb.

FOR SALE—Coleman's gasoline lamp; one child's hand sleigh. Apply Mrs. A. Kastor, Phone 75, Viking, 11p.

TEA AND SHOWER.
The Ladies Aid are planning a tea and shower to be held at the Manse on Saturday afternoon and evening of October the eleventh. There will be no charge for the tea and the shower is to be a miscellaneous one for the benefit of the Bazaar, and will be held on the first day of November. Every lady in the Irma district or out of it, are cordially invited to bring their friends for a social hour and if not a donation, to see the work that will be for sale at the Bazaar. Don't forget the date, Saturday afternoon and evening, October 11th.

CHURCH NOTICES AND ACTIVITIES

Sabbath Day Finds the Community
Joining in Observance, Prayer,
and Church Attendance.

UNITED CHURCH NOTICES
The services next Sunday will be at Strawberry Plains, Roseberry and town at the usual hours. The topic will be "The Set of the Soul."

After next Sunday the hour of service in town will be at 7.30 p.m. Will our friends please note this change.

We are planning to get all the mid-week activities going in full swing. Watch for further announcements.

ANGELIC CHURCH SERVICE
Next service will be held on Sunday, September 21st in Irma United Church at 3 p.m. All W. A. members are especially invited to attend this service for corporate communion.

Next W. A. meeting will be held on Tuesday, September 23rd at the home of Mrs. P. Yeend at 2.30 p.m. Every lady welcome.

The W. A. are holding a Whist Drive in the lodge room, on Thursday, October 9th. Prizes given. Adults 50c.

ST THERESA CATHOLIC CHURCH
IRMA, ALBERTA

Service on the first Sunday of each month at 11 a.m.

NOTICE OF DISSOLUTION
NOTICE is hereby given that the partnership heretofore existing between Alfred Carl Carbol and Albert White, of Irma, Alta., under the firm name of Carbol & White is this seventeenth day of September, 1930, dissolved by mutual consent.

Alfred C. Carbol
Albert White

The business will be conducted at Irma by A. Carbol, who is authorized to settle the affairs of the said firm.

GIVEN STIFF SENTENCE

Seven years in the penitentiary at Prince Albert was the sentence imposed on Ejnor Kristensen, absconding teller of the Bank of Montreal at Leduc, by Magistrate Williams on Wednesday morning.

Kristensen pleaded guilty to the charges against him and seemed anxious to know his fate as soon as possible. He was arrested in Calgary while enroute through to the coast from Winnipeg, under the name of T. N. Olsen. After leaving Edmonton on Saturday, August 30th, he proceeded to Saskatoon and flew by aeroplane from there to Moose Jaw where he took the train to Winnipeg. The actual amount of the defalcation was \$8,419.54. Kristensen had about \$1000 on him when he was arrested and claims that \$5,000 of the amount he took from the bank was stolen from him while travelling on the train between Moose Jaw and Winnipeg. — Leduc Representative.

CORRECTION

The next meeting of the Valley Spring Local No. 77 and the Valley U. F. W. A. will be held at the home of Mr. and Mrs. J. F. James on Thursday, October 9th at 2.30 p.m. Rev. Gordon Mervyn of Rose town, Sask., has been spending a week's vacation with Mr. and Mrs. J. H. Archibald and relatives of this district. He will leave shortly for his home at Hanover, Ontario.

NOTICE RE WEEDS

The Council have given instructions to Mr. J. W. Plummer, the Municipal Weed Inspector to write to all ratepayers whose farms last year were reported as being infested with Perennial Sow Thistle and Canada Thistle, instructing them to take steps to eradicate these weeds. He is following this up with a personal visit and should these instructions have been neglected, he has orders to take action.

He is also checking up on threshing machines to see that they are complying with the Weed Act.

Farmers are also notified that they are responsible for the immediate destruction of the weed seeds after threshing.

B. H. GREEN, Sec.-Treas.

Life, says a careful observer, is a struggle in which everyone tries to get what they want, and tries to forget what they deserve.

POOL TAKES ACTION AGAINST MEMBERS WHO BOOTLEG WHEAT

Winnipeg, Sept. 11.—Bootlegging of Pool grain Thursday engaged new attention from the Manitoba branch of the world's greatest co-operative body—the Canadian Wheat Pool. Action in seeking 11 interim injunctions against central Manitoba pool members at Winnipeg Wednesday was followed by further injunctions obtained against farmers in the western section of the province.

The alleged bootlegging consists in violation of the five-year contract by delivering grain to other than pool elevators.

YOUNG CHILD AT FORESTBURG FALLS INTO HOPPER OF COMBINE AND IS CRUSHED

Barbara Maad, the three year old daughter of Mr. and Mrs. Fred Bish, died Friday afternoon at the Galahad hospital where she had been hurriedly taken after having her legs broken and had suffered other injuries, in the combine elevator while in operation on the farm south of Forestburg.

The dear little girl, in company with her twin brother, and twin cousins about the same age, was standing on top of five feet of wheat in the grain tank on the combine. Although the children were guarded very closely, Barbara suddenly slipped and with the suction was quickly drawn to the bottom and side of the tank and into the elevator box before her disappearance was discovered. The grief stricken father and uncle, who were working on the combine, rushed the unfortunate child to Galahad hospital where she died about two hours later.

OFFICIAL NUMBERS FOR MAIN ALBERTA HIGHWAYS

Official numbers have been given to all the main motor routes in Alberta while "7700" signs are to be placed along the most used roads, this work having been undertaken by the Public Works Department. Signing of roads in the south have been completed and now crews are completing their season's operations in the north. All the number signs are uniform in style and indicate at main intersections or elsewhere the number by which that particular road is known on the maps or in other motor literature.

When this season's program is completed, the Public Works Department will have signed hundreds of miles of Alberta highways.

The highways will be numbered as follows:

- No. 1—Carway, on the international boundary, north through Lethbridge, Calgary and Edmonton to Peace River.
- No. 2—Wask-Buff.
- No. 3—Medicine Hat-Crow's Nest.
- No. 4—Lethbridge-Courts.
- No. 5—Cardston-Waterton.
- No. 6—Pincher-Waterton.
- No. 7—Okotoks-Turner Valley.
- No. 8—Calgary-Bowness.
- No. 9—Drumheller-Alaska.
- No. 10—Drumheller-Wayne.
- No. 11—Red Deer-Sylvan Lake.
- No. 12—Lacombe-Comper.
- No. 13—Wetaskiwin-Hayter.
- No. 14—Edmonton—Cooking Lake-Tofield.
- No. 15—Lloydminster-Jasper.

SALE AND REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)

Under the Domestic Animals Act, (Municipalities)

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that —

1 Black Gelding, middle aged, about 1200 lbs., white star, also strip of white underneath, was impounded in the pound kept by R. Headon, located on the S. E. 32-45-7 with on Wednesday the 25th day of July, A.D. 1930, and that the said animal was sold on the 6 day of August, 1930 to Thos. Shaw, of Falyan.

—and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

R. J. TATE, Secy.-Treas. of the Municipality of Battle River No. 423 Post Office Irma Alta.

CAMROSE AND DAYSLAND CONNECTED BY NEW GRADED HIGHWAY

A few days ago the contractors completed the grading of the new highway, which parallels the Canadian Pacific tracks from Camrose to Daysland. The road is very good in dry weather and the distance between the two points is considerably lessened. It is expected that the provincial government will complete this section of highway next year by surfacing with gravel. It is interesting to note that Daysland and intermediate points between that town and Camrose will then have a gravelled main artery of travel extending to Edmonton, Calgary, Banff and through Southern Alberta to the Canadian-American boundary.—Camrose Canadian.

ON TIME

Now that the school calls at 9 o'clock every morning, in many a home both city and country, there is a grand and glorious scramble and rush to get the children ready on time. Some boys and girls never do acquire that most valuable of habits—punctuality—and they go through life trying to catch up and never getting there. Looking at lateness from the point of view of the teacher and classroom, it is one of the unpleasant and unpardonable annoyances that take the joy out of the day.

Looking at it from a health standpoint the child with breakfast bolted and his appetite unsatisfied makes a poor pupil. He starts the day handicapped.

The remedy is a simple one and holds the secret of a life's success. Examine a set of rules of the health game of the Junior Red Cross and it will be seen that one refers to sleeping. Going to bed on time is the key to the situation of being on time at school. This is too valuable a habit to be ignored. Let every mother have a set of rules in the home. Write for your free copy to Junior Red Cross, Civic Block, Edmonton.

CANADA'S NEWEST SEAPORT

Development of the townsite of Churchill, Canada's newest seaport, on Hudson Bay, terminus of the Hudson Bay Railway, is expected to start next spring. The Hudson Bay Railway was built by the Canadian Government and is to become a part of the Canadian National Railways.

The entire townsite of Churchill is owned by the Province of Manitoba and it is to be developed along modern town planning lines. No property will be sold but, instead there will be long term leases subject to reasonable division at stated periods, such as every three or five years.

Engineers are now at Churchill working out plans for water works, water mains and sewerage lines. The town plan will specify locations of public buildings, schools, churches, railway station, hotels, business streets residential section and recreation grounds. Adequate surveys will be made this year. A compact settlement is planned with the initial residential construction possibly in the form of apartment houses, heated by a central plant that would also furnish heat for business blocks and public buildings. Settlement will adhere to a carefully devised town planning scheme with proper safeguards made for future development and attention given to recreational facilities.

Many applications from those who wish to establish business houses of all descriptions at the new seaport are being received by the Manitoba Government. Three or four hotels and restaurants and a lumber yard will mark the initial construction at Churchill and work on these will probably start in October, when the survey will, it is expected, have been completed.

When in Banff, stop at the Homestead Hotel and meet your Alberta friends. Ask to see the last edition of the Irma Times and get the latest news from home.

TOO LATE FOR PUBLICATION
Owing to the report of the minutes of the Council Meeting of the Municipal District of Battle River No. 423 being received too late for this week's issue, they will be published next week.

Economic Unity Of The Empire

Within a few days the Imperial Economic Conference will be convened in London, England, and representatives of the British Government will sit down at the conference table with representatives of the self-governing Dominions and discuss matters of mutual concern to all members of the British Commonwealth of Nations.

It will be a momentous, epoch-making event in the history of the Empire. There have been Imperial Conferences in the past, but they have had to do with constitutional and political aspects of our Empire's relationships. For the first time serious consideration is to be given to the economics, the trade and commerce of the Empire as a unit, and to the future lines of policy to be followed by each British nation in its trade relations with the Motherland and the other Dominions on the one hand, and with the rest of the world on the other hand.

The Conference, therefore, will make history, and exert a profound influence on the future of each of the self-governing Dominions, the British Isles, the widely-scattered British colonies, in a word, the whole Empire, while at the same time its decisions will inevitably create a reaction in, and affect the policies of all other nations. A nation can no longer live in "itself alone." The adoption of any given policy by one of the major nations of the world in the present advanced state of our world civilization affects all other nations. They must take cognizance of it and govern themselves accordingly. And if this is true of the action of any one nation, it is immeasurably more true of a great union of nations comprising one-quarter of the earth's surface and more than one-quarter of the world's population.

The forthcoming Imperial Economic Conference is fraught, therefore, with great good or ill for the Empire. Today, while politically and sentimentally one, it is divided economically, each individual self-governing unit treating each other in matters of trade much the same as they do foreign countries, and each coping singly with great economic problems which through joint action they might be able to solve.

The first question for the approaching Conference to consider and decide is: Shall this condition continue? Can it continue with safety to the future of the Empire? The Empire was created by conquest and built up by trade. The day has passed when Great Britain can dominate the trade of the world. Entirely new world conditions have developed, particularly during and since the Great War. As a result Britain has lost much of her world trade and economic and financial predominance. The whole world has become industrialized. Single handed Britain cannot hope to regain her lost leadership in trade and commerce, but cannot she do so in co-operation with the Dominions? Will political and sentimental ties hold the Empire together if its component parts are bitter rivals in trade, giving advantages to foreign countries, regardless of the welfare of sister British nations, solely because it seems beneficial to the individual units to do so?

These are matters for the consideration not only of Britain but for all of the Dominions as well. They transcend party politics everywhere. It is the future of the Empire that is at stake.

Assuming the decision of the Imperial Economic Conference to be that such a condition cannot continue, that they must unite upon economic lines as well as upon political lines; the next step is to find common ground of action. Admittedly it is in connection with the working out of details of policy that definite, concrete problems of opposing and conflicting interests will arise. They cannot all be solved at once, but a very real start can be made along lines of least resistance, leaving the future, in the light of actual experience, to further extend and develop the agreed upon policy as circumstances may dictate to be of mutual advantage.

A recent newspaper despatch from Ottawa intimated that the West was not greatly interested in the outcome of the Imperial Economic Conference. No greater misconception could possibly exist. The West is vitally interested. To a greater extent, perhaps, than any other part of Canada, its future is wrapped up in a successful outcome to the approaching deliberations in London. In no part of the Empire will the people evince a greater interest, possibly even anxiety, than on the prairies of this Dominion.

Making Sure Of Good Seed

The Ontario Department of Agriculture is taking time by the forelock in so far as making preparation for the World's Grain Exhibition and Conference at Regina, in 1932, is concerned. Farmers are being urged by the department to keep this year's seed in the event of the crop of next year not being up to the high standard of former years.

Despite the cold and long sunless periods in the Arctic Zone, about 2,000 specimens of plant life have been discovered there, among them willows, junipers, ferns, mosses and numerous flowering plants.

Inhale Minard's Liniment For Asthma

Caravans of camels passing through Afghanistan—sometimes number 120,000 laden beasts.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

What's In a Name

Winnie Chicken and Bert Bird, of London, England, have announced their engagement, which brings back memories of another London affair, a little while ago when Archie Rook was married to Carrie Swan, with Rev. James Crowe officiating as clergyman. The couple were driven to their home, which they called "The Nest," by Robert Starling.

Douglas' Egyptian Liniment is an excellent leg wash for stock. Also moves corns in horses and quickly relieves bruises, sprains, swellings and joint stiffness.

Commercial fruit production last year in Canada had a value of \$19,281,240, of which Ontario accounted for \$8,456,097; British Columbia, \$6,766,550; Nova Scotia, \$2,830,688; Quebec, \$1,145,846, and New Brunswick, \$192,659.

Africa Interested In Grain Show
Evidence that competitive exhibits from far off Transvaal, South Africa, will be received for entry in the World's Grain Exhibition and Conference at Regina, 1932.

request to the office of the exhibition for a number of tags for attaching to exhibits. The Hartebeestpoort Experiment Station at Brits, Transvaal, is also anxious to receive special information regarding the exhibition of corn.

The greatest mistake we can make in life, is continually to be fearing that we shall make one. Never explain. Your friends do not need it, and your enemies will not believe you.

Self-Cracking Nuts

British Scientist Makes Important Announcement

Here's comfort for the people who have a hard time in extracting the meat from the proverbial, stubborn nut.

Dr. A. W. Hill, of the botanical research station, at Kew, England, told the British Association for the Advancement of Science, that it was at last possible to produce self-cracking nuts.

"This is a valuable achievement in a commercial sense," Dr. Hill remarked. "For instance, in California pistachio nuts have been commercially valuable owing to the cost of cracking them."

The botanical expert also recorded research achievement in the case of times which had a useful habit of shedding the fruit when it was ripe, thus enabling the collection of times on the ground. Botanists, he said, were now striving to produce banana manure and cucumber and curing inwards on a bunch. This new curve, if brought about, would enable the fruit to be handled more easily and to take up less room on board ship.

Do You Value Your Health?

If your health is poor; if you are pale, nervous and easily tired; if you suffer from headaches and backaches; if your digestion is bad you may depend upon it that these symptoms come from an impoverished state of the blood. That unless this condition is remedied a complete breakdown may follow. Dr. Williams' Pink Pills are a perfect medicine for any one in this condition. They enrich and purify the blood and thus promote health and strength.

Mrs. G. M. Andrews, Halifax, N.S., writes: "I always keep Dr. Williams' Pink Pills in the house. When I was a young, anemic girl they completely restored my health. After marriage my health broke down and once more these pills brought me back to health. My friends all tell me how well I look and for this Dr. Williams' Pink Pills deserve all credit."

You can get these pills at all medicine dealers or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Useful To Motorist

Recent Invention Shows Driver When Headlight Not Burning

It is often difficult and sometimes impossible to tell from the driver's seat whether both headlamps are lighted. Dr. W. Kennedy, of Toronto, has invented a simple, yet effective and attractive little gadget that is readily attachable to headlamps and constantly reveals to the driver whether the lamps are lit or not. They are small reflectors in various designs which fasten to the headlight rims, they are luminous at night and visible from the driver's seat.

Asthma Is Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering is. Thousands do know, however, from experience how immeasurable is the relief provided by that marvelous preparation, Dr. J. D. Kellogg's Asthma Remedy. For years it has been relieving the most severe cases. If you are a sufferer do not delay a day in securing this remedy from your druggist.

Predicts Speedy "Flying Subs"

Will Cruise Eight Miles Above Earth, Says Edward Warner

"Flying submarines," to cruise at 250 miles an hour eight miles above the earth, were predicted by Edward B. Warner, president of the Society of Automotive Engineers. Cruising speeds of 100 to 250 miles an hour were sufficient for present needs, he declared, except in certain parts of the west and north, where travellers wish to fly 1,500 miles between dawn and sunset. When more speed is demanded the "submarine" and the "rocket plane," long a dream of Glen-Curtiss, would be developed, Warner said.

Africa Interested In Grain Show

"Reddened, burn, itch and pain of piles (internal and external) relieved in 1 minute. No surgery, no medicine. No pain. Get instant relief today. All Druggists."

Piracy On High Seas

Pirates Cause Plenty Of Trouble Along Coast Of China

"Gunners for duty on the high seas as a precaution against piracy are in great demand in Far Eastern ports due to the recent announcement of the British Government that all soldier guards were to be withdrawn from ships sailing the South China waters." "White" Russians with military experience are being recruited in Singapore, Hong Kong and Shanghai, to take the places of the soldiers. The anti-pirate brigades will be under command of non-commissioned officers of the British army.

British soldiers were placed on British vessels about three years ago at a time when the pirates were specializing in sea-going vessels. In one raid alone several Britishers were killed and the pirates made off with a score or more of hostages and \$50,000 in specie. For centuries pirates have been rising and falling along the coast of China. It is still in this region that the pirates have their headquarters. Their lair is in the notorious Bay Blas, 50 miles north-east of Hong Kong, where there are rugged mainland hills in the background to which the robbers withdraw when sought by armed forces from the waterfront.

Master minds work out details of the robbery of the larger ships. In some instances three to four months have been devoted by the pirate chiefs to arranging details of a single haul, which when successful, pays most handsomely. To cope with this situation, the British shipping interests have been compelled to spend much money and at the same time perfect a system designed to reduce the chances of piracy to a minimum.

Specialists have been engaged and a new form of gunnery has gradually developed in this part of the world. He must not only be handy with a revolver but with a rifle as well, and officers of ships plying these waters must be well versed in the handling of fire arms.

Worms sap the strength and undermine the vitality of children. Steady eating and using Mother Graves' Worm Exterminator to drive out the parasites.

Latest Electrical Appliances

Light Can Now Be Blown Out Like a Match

Old jokes about lazy folks who work merely by drawing their breath has become the latest reality of scientific developments to reduce manual physical toil.

An electric light which can be blown out with the same small puff that extinguishes a match was placed on exhibition at the Westinghouse Lighting Institute, New York.

Its secret is a new kind of electric switch, called a "puff relay," for which is promised many useful applications. It can be set to turn either on or off.

Persian Balm is a sheer delight to use. Cools and relieves irritation caused by weather conditions. Imparts a rare charm and beauty to the complexion. Fragrant and velvety smooth. Never leaves a vestige of stickiness. Swiftly absorbed by the tissues and stimulates the skin. Persian Balm is the perfect toilet requisite. Every woman will appreciate the subtly distinctive charm achieved by the use of this magical lotion.

A musical slot machine has been invented in England which vendes cocktails properly iced and scientifically blended.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Patron—Let's have some ginger ale.

Waiter—Pale?

Patron—No, just a glass will do.

Hay Fever

and catarrh are offensive ailments. Heat and inhale Minard's a few times daily, as for colds. It stimulates and relieves the membrane.

Rural School Supervision

New Plan Of Rural School Improvement Inaugurated In Saskatchewan

Announcement was made recently by Premier J. T. M. Anderson, Minister of Education, of the appointment of the first rural school supervisor for Saskatchewan, under the new plan of rural school improvement being put into effect by the Department of Education.

Miss Mary Isabella Grant, of Cabri, Sask., is the first supervisor to be appointed by the Public Service Commission and will assume her duties immediately in the new experimental supervisory school area in the neighborhood of Kindersley and Glendon, Sask.

The appointment of rural supervisors, according to the premier, is being made in accordance with numerous requests from school trustees and ratepayers throughout the province who wish to co-operate with the Department of Education in a plan to provide closer supervision of rural school education.

The Minister of Education believes that the experiment will do much towards solving the many problems of Saskatchewan's rural school education.

Is it usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the child from deriving sustenance from food. Miller's Worm Powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Honeymooners Take To Air

Jeune By Train Or Ship Is Considered Old-Fashioned

Honeymooners by anything so common-place as a train or ship are now, "frantically old-fashioned," says the London Daily Mail. A journey to Paris by air is the only fitting beginning of a modern wedding tour. A Crocyon official says that honeymoon couples are departing and arriving almost daily. Brides are arriving from church still in their wedding gowns and veils, blushing as they are pelted with confetti while boarding a plane, which is usually decorated with flowers, but nobody has yet attempted to tie a lucky shoe to the tailfin.

Farms In New York City

As unbelievable as it sounds, there are 320 farms within the confines of New York City. This metropolis devoted to industry and money-making, houses 250 farms in Queensborough, 66 in Staten Island and four in Brooklyn. They are all truck farms.

Her Three Children

Troubled With Diarrhoea

Mrs. Leo Lapointe, Laurier, Man., writes: "My three youngest children were very bad with diarrhoea. I tried all kinds of remedies, until a kind old lady told me to try Dr. Fowler's Extract of Wild Strawberry. I got a bottle right away and started giving it to them, and the next day the diarrhoea had stopped altogether. Now I will know what to do when any of my children are troubled that way again."

On the market for the last 85 years; put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Responsibility For World Peace That Rests Upon Those Who Speak The English Tongue

Dr. Nicholas Murray Butler, president of Columbia University, addressing the Pilgrims Society in London, England, recently had a telling word to say of the responsibility for world peace of the English-speaking world.

Dr. Butler said: "Everyone within the sound of my voice has read those opening chapters of the first volume of Mr. Winston Churchill's book, 'The World Crisis.' Those chapters trace with a hand of fate from Fashoda to Sarajevo what Mr. Churchill calls the milestones of Armageddon. You can actually see men in the hands of Fate marching to their death accompanied by an irresistible music of lure and ambition. Perhaps many of you have read what seems to me to be an exceptionally interesting bit of journalism in his done by Herr Egon Ludwig in his recently published volume called 'July, 1914.' He has assembled there what recent research enables him to do, and has placed in logical and chronological order every document which tells the story of that fateful month and of the first few days of the month that followed.

If you will read those documents you will see that perhaps twenty or twenty-five men, alone and unaided, carried ten million human beings to their death and destroyed the wealth of generations. What I mean, Mr. Chairman, is, imputing blame to none, least of all finding fault with an individual, what I would point out is that all that represents the bankruptcy of a mode of thinking upon which we must turn our backs. We must rise from the old-fashioned, selfish, competitive, quarrelsome nationalism to a new and loftier patriotism which finds a nation's highest purpose in its highest service. And when, Mr. Chairman, we state that fact, we indicate in a way that responsibility that rests upon those who speak the English tongue.

It makes no difference whether they live in this old homeland island or whether they have gone out overseas to build a dominion of the British Commonwealth or Nations, or found a government of their own. Their responsibility is one and single and undivided because of the trust they bear, and that trust is the trust of those institutions of civil, religious, political and economic liberty which we have been building for more than a thousand years. These institutions it is that we offer to our fellow-men, and the time has come to do this by effective example on our part, by persuasion and by leadership, through those who speak our views and frame our policy. We dare not, Mr. Chairman, sit still and let matters drift and take their course.

Rust Not Poisonous

Scientists Do Not Consider Harvesting Of Rusted Wheat A Cause Of Septic Poisoning

Scientists at the University of Saskatchewan engaged in rust research do not consider that the harvesting of rusted wheat involves special dangers of septic poisoning as is suggested in a news despatch from Avonhurst, Sask., where a man is stated to have died of septic poisoning contracted while harvesting rusted wheat.

Dr. P. M. Simmonds, of the Dominion plant pathology department, considers that such danger is unlikely. The cause of death, he thought, would probably be due to getting dirt in a wound, a danger which might equally occur in the absence of rust.

"The truth hurts, and so would you, if you were stretched as much.

"Is there still as much fighting here in the village as there used to be?"

"Oh, no! The people don't agree at all now," — Nagel's Lustige Welt, Berlin.

W. N. U. 1858

Safeguards the Consumer

Inspection Service For Fruits and Vegetables Assures Quality

The shipping point inspection service administered by the fruit branch of the Dominion Department of Agriculture is doing more than anything else to improve the quality and extend the market range of fruits and vegetables in both the domestic and export markets. Providing as it does a neutral determination, the certificate of the federal inspection service is accepted everywhere as the criterion of quality. The service applies to the canned as well as the fresh product, and the housewife buying canned products in Canada knows that she gets what she buys when she buys by the quality mark—"Choice," "Fancy" or "Standard"—which appears on the label. The quality determined by inspection at the shipping factory goes into the can before the label goes on. The Federal grade marked on the container is the consumer's safeguard and the assurance of quality.

Grain At Churchill

Will Be Successfully Grown Within Few Years Is Prediction

Wheat, oats and barley will be successfully grown at Churchill within four or five years, predicts D. A. Brown, of the Dominion Government Experimental Farm at Brandon, who has returned from a trip to the Bay port. Mr. Brown forecast that grains would mature well at Churchill with proper cultivation and good soil.

Winnipeg Newspaper Union

(By Eva A. Tingey)

SMALL DAUGHTER STYLES

When little daughter reaches a certain age, you may fancy she'll be better suited by a belted rather than a straight frock. Here is one which has both qualities. It can be worn either way, and is therefore suitably a pattern for the little girl as her schoolgirl sister.

It is prettily yoked, has simple easily pressed box pleats, and long sleeves—a nice model for "back to school again."

Carried out in cotton it is of course easily laundered and can have the wee rick-rack edging as shown. In woolen materials the rick-rack can be sewn on to a tape and made removable.

This trim is a childish way of adding a white touch as pique serves for grownups.

This pattern may be obtained in sizes 8 to 14. It is ready for immediate delivery. It is hand cut. Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Mechanical Hen Was

Instructive Exhibit

Created Great Amount of Interest At World's Poultry Show

The exhibits in connection with the recent world's poultry congress in London, England, were instructive and entertaining.

A model hen, seven feet tall, held the attention of thousands of visitors each day largely on account of its novelty. Made of wood and cardboard and a few feathers, this bird had a set of mechanical "internal organs" which were visible and showed how feed is ground in the gizzard and distributed. Naturally it would not be completed without an arrangement for laying eggs. A small motor operated the lathe on which the eggs were "turned." Then small mannikins were attached to the various parts and appeared to furnish the power which really came from electric motors installed behind. With the aid of a special phonograph record the "hen" gave full explanation of the internal processes and incidentally gave information on proper feeds and methods of feeding. Poultrymen have shown a great deal of enterprise in bringing before the public the outstanding features of their industry and this "mechanical hen" is one of the outstanding accomplishments.

Marketing Geese

Good Time Now To Prepare Them For Shipment

The time to prepare geese for market is when the weather turns cold in the fall, state poultry experts of the Dominion Department of Agriculture. They should then be taken off pasture and those selected for export should be placed in small penned enclosures, provided with plenty of water and grit and kept clean. They should be fed heavily on whole corn, the best medium for the fattening of geese, and about two weeks' heavy feeding should fit them for market. Twenty-four hours before killing geese should be starved, but given plenty of water. Care should be used in plucking, the dry or steam methods being recommended, for the reason that the feathers are particularly valuable, bringing as much as 60 cents per pound. The dressed bird should be rubbed over with a damp cloth and set aside to cool. The twelve-bird box makes a desirable market package.

New Kind Of Sugar

Prepared For Table Use It Melts Quickly Into Fruit

It is a well-known fact that some foods are difficult to sweeten properly. One puts sugar in a glass of iced beverage and finds that most of the sugar remains at the bottom of the glass, and the drink itself is not sweet. Many uncooked cereals, too, are hard to sweeten. The same is true of certain fruits and berries now on the market. In view of this, housewives will be glad to learn that a new sugar has been prepared for table use which dissolves almost before it reaches the bottom of the glass, and the beverage is uniformly sweet. It melts quickly into fruits and berries, penetrating to every part of the fruit and adding zest to delicate flavors. It is especially suitable for cereals, blending smoothly and deliciously with cream.

Steam From Volcano Heats Hotel

Operators of a hotel being constructed in Hawaii are eliminating all handling of coal for heating the building. The structure is being erected at the edge of the crater of Kilauea, the largest crater of an active volcano in the world. Steam from the volcano will be utilized to heat the hotel.

Canadian Cattle Re-enter England

Canadian beef will re-enter the British market for the first time since 1928 with the shipment from Montreal recently of 128 head of grade Hereford and shorthorn steers, bred in Ontario and now consigned to a firm of importers in Manchester. The majority of the steers were raised on the farms of P. J. Henry, of Ridgeway, Ont., and A. J. Campbell, of Dutton, Ont., and were brought on the Canadian Pacific Railway to the Eastern Cattle Market, Montreal, to await shipment to the old country. Shippers of livestock believe that the British market, dead for the past few years so far as Canada was concerned, since more offers remarkable opportunities to Canadian breeders. One hundred and sixty thousand head of cattle and 62,000 calves, in addition to 25,000,000 pounds of dressed beef, were shipped from Canada to the United States last year, but for the future such trade is severely hampered by the unfavorable American tariff.

Northwest Rebellion Veteran

Private Of Royal Grenadiers Visits Scenes Of Battles Of 1885

Andrew Mursion, who as a 21-year-old private of the Tenth Royal Grenadiers took part in the battles of Fish Creek, 30 miles north of Saskatoon, April 24, 1885, recently revisited the site of the combat.

He found the battlefield exactly as he remembered it to have been 45 years ago. He saw the ravine where among the trees the half-breeds hid their rifle pits and threw themselves on the ground in the open.

Mr. Mursion tells how the advance scouts were shot from this ambush and the riders came galloping back. The troops then advanced as if on parade and threw themselves on the ground in extended order. They fired back at the Indians, but only got an occasional glimpse of one as the enemy had prepared pits just over the lip of the ravine and only a head would sometimes be seen as a man rose to shoot.

General Middleton had a horse shot under him and his cap blown off by a bullet, an incident which Mr. Mursion saw. He also recalls how a shell from the artillery blew up the Tourage House in which a number of rebels were concealed. A hollow in the ground now shows the former site of this house.

After a time the Indians disappeared from the ravine and the soldiers entering it found about 60 of the Indians' horses which had been killed by the shell fire. They found no Indian dead. The graves at Fish Creek are those of artillerymen killed in the battle.

Mr. Mursion also took part in the four-day battle at Batoche, on May 9, 10, 11 and 12, 1885, with the big charge on the final day. The church at Batoche near where the fighting began still stands.

Colonel Grassett, who commanded the Tenth Royal Grenadiers at Fish Creek is still living in Toronto, says Mr. Mursion.

Egg Laying Contest

University Of Saskatchewan Hen Makes Good Showing

"Lady Victoria," former holder of the world's egg laying record, has completed her second year with an output of 203 eggs. In her pullet year this hen laid 338 eggs in 365 days, copping the record, but this has since been taken from her by a Black Orpington pullet in Australia, which produced 361 eggs in the year.

Though not a world's record, "Lady Victoria" did well to lay 203 eggs during her second year. Prof. R. K. Baker, of the university poultry department, says, "It is a high figure and will provide the university with much material for breeding purposes. Two daughters of the former champion started laying this week."

The Proper Approach

A man who had been waiting patiently in the post office could not attract the attention of either of the girls behind the counter.

"The evening cloak," explained one of the girls to her companion, "was a redingote design in gorgeous lamb brocade, with fox fur and wide pagoda sleeves."

At this point the long-suffering customer broke in with: "I wonder if you could provide me with a neat red stamp with a dinky perforated hole, the tout ensemble delicately treated on the reverse with gum arabic. Something about two cents."

"England," says a news item, "offers a large field for the saxophonist these days." What could be better for a saxophonist than a large field?

National Television On A Nation Wide Network Is A Dream Of The Future

Water and Salt

Live Stock and Especially Young Animals Are Often Neglected

How about the water and salt? As a rule, dairymen are careful that the cows always have plenty of good water. If the water is lacking or stale, the cows soon tell about it in the pail. Shorter milk checks keep interest to discover the cause. Observation reveals that the growing stock suffer more from lack of water through the hot months than do the milk cows. They are pastured away by themselves and not seen so often. If the water has to be pumped to them, it is often neglected. If they have a stream or spring and it goes dry, it may be days or weeks before the trouble is discovered. In too many cases the young stock drink swamp water and take it only as a matter of necessity. Under such conditions they cannot do well, no matter how good the grass may be. Another frequent cause of lack of thrift is shortage of salt. The salt box should be a regular part of pasture equipment. To build up a good store of minerals in the system a mixture of three parts bone meal and one part salt is advised. The same mixture should be used in the pasture for the milking herd.

Weed Seeds Are Hard To Destroy

Germination After Fifty Years Shown In Recent Tests

No wonder the farmer has trouble trying to eradicate weeds, for Dr. W. J. Beal, of the Michigan experimental station has just shown how long lived some of the seeds are. Fifty years ago he buried a lot of several different kinds of weed seeds. Every ten years some of these seeds are dug up and the attempt made to germinate them.

Strange as it may seem, some of the weed seeds which did not grow at the end of five or ten years germinated to some extent at the end of 40 years. Foxtail lived for 30 years, but has not been growing since. Two-thirds of the tumbleweed seeds were still germinable after forty years. Curled dock seed was a much longer life than might be expected, and was eighteen per cent germinable in the fortieth year. Several weed seeds will not live for even five years, but a great many of them will retain at least some vitality for thirty or forty years. Does this not show how very careful the farmer must be to cut the weeds before they have a chance to seed and spread many potential plants around.

Mass Production

On Western Farms

Great Resources Of Capital Are Back Of Enterprise

The day when one or two thousand acres was considered a large farm seems to have passed in Western Canada. Seven large land-owning companies now propose to farm a total area of about 850,000 acres. Great resources of capital are back of the enterprise.

Very large farms in the past have not been conspicuously successful, says the Farmer's Advocate. The smaller farm, under the personal ownership and direction of the individual farmer, has been the foundation of Western Canada's agricultural prosperity. Changing conditions and the possibility of mass production by mechanical means may be ushering in a new day in agriculture, under which the individual farm holding will to some extent disappear.

Mail Was Delayed

Letters mailed 26 years ago in Paris have been sent to their destinations. The delayed mail was discovered when a truck demolished a post box in front of the Luxembourg station. Examination of the wreckage revealed that letters and postcards dated 1804 and 1805 had apparently slipped into a neglected corner of the box and were never collected.

Latest Paris Novelty

Map-study with meals is the latest novelty in Paris. Tablecloths are embroidered with outlines of countries, and lamps with map shades are the finishing touch. One popular decoration is a chandelier of the moon embellishing a globular, opal lamp.

"What is the difference between capital and labor?"

"Well, I suppose I lent you \$5."

"Yes!"

"That is capital."

"Then what is labor?"

"Getting it back from you."

National television on a par with sound broadcasting is a considerable distance in the future. When such a development will materialize, engineers hesitate to say. Dr. Alfred Goldsmith, vice-president and general engineer of RCA, and long identified with broadcast engineering, thinks it will not be possible until three years have elapsed, and it may be longer.

"It seems likely that national television service of proven value within a year would be available," he said. "Within two years it would be an amazing feat; within three years it would represent a fine achievement of hard work, and within five years it would be a development proceeding at a good and normal pace."

"If television is developed as a service of real entertainment and instructional value to the public it will take its place beside radio broadcasting as one of the greatest agencies of human progress and enjoyment, but it is not to be expected that the day of television is as yet in the laboratory. The men are doing excellent work in the development of television and will probably ultimately bring the equipment to a satisfactory stage for public use. It is dangerous to make any definite prediction as to how long this will take."

Dr. Goldsmith pointed out that the term television means so many different things to various people that a clarification is important. "Some think it means small, dim, blurry and shifting images. Others think it means perfect, large, brilliant pictures like the finest movies."

"Television is a radio service of pictures in motion of sufficient detail and quality to have continuing entertainment value to the public, month after month and year after year. It is believed that it is necessary to be able to hear clearly the head and shoulders of several people in a closeup and also action of a group at a greater distance with a reasonable amount of background detail."

"It is necessary that receivers supplied to the public be simple, compact, and fairly automatic and reliable in operation and reasonable in cost. Pictures must be brilliant enough to be seen in an ordinary dimly lighted room, of good color, of adequate detail, of real pictorial value, without annoying flicker, and visible to persons seated in various parts of the room."

"In order that the people of the United States and Canada shall enjoy such a service it must be carried out on a national scale. This means erection of numerous television transmitters. They must be located at proper points all over the country, and on occasion be interconnected by wire, radio or through shipment of film subjects so that programmes of interest may be brought to the public promptly."

Establishment of transmitting station and creation of programs for the entire continent is a lengthy and expensive job. To be of value to the public, programmes must be arranged so that they will co-ordinate sight and sound properly. Correct wave-lengths for television for city, suburban and rural service must be determined. In correct choice of wavelengths means ruined or unreliable transmissions."

Rose Growing Business

Rose growing as a business is rapidly developing throughout Canada and is of considerable magnitude, according to the Ontario Department of Agriculture. Although the great majority of growers are located in Ontario, nurserymen and florists are cultivating roses in every province of the Dominion.

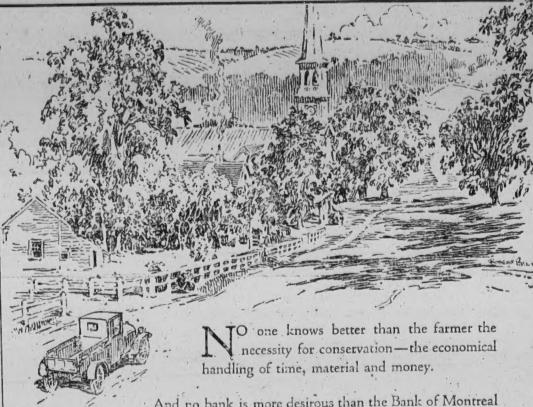

Good News For The Cook

It is planned at Paris to make a talking picture revealing the art of French cooking. The preparation of French delicacies, sought after the world over, will be depicted and explained in the film by an expert chef, who will be seen at work. The film is intended for world distribution.

Absent-Minded
The professor who hasn't forgotten his umbrella. — Hummel, Hamburg.

CO-OPERATION

NO one knows better than the farmer the necessity for conservation—the economical handling of time, material and money.

And no bank is more desirous than the Bank of Montreal to co-operate with farmers to the end that their financial affairs and business interests will be placed on a sound basis.

New Post In C.P.R. Telegraphs

Growth of the Canadian Pacific Telegraphs and pressure of business have brought about the appointment of an assistant general manager, a new position, creation of which was made effective this month. The new assistant general manager goes to W. D. Neil, who was assistant manager western lines, stationed at Winnipeg, No. 4 of the Canadian Pacific Telegraphs. Other appointments resulting from this are: No. 3, W. M. Thompson, assistant, Ontario Division, Toronto, to be assistant manager, western lines, Winnipeg; No. 1, H. S. Ingram, superintendent, eastern division, Montreal, to be superintendent, Ontario division, Toronto; and No. 2, W. S. Emery, chief operator, Montreal, to be superintendent, eastern division, Montreal.

Many Uses For Honey

UNCOOKED HONEY ICING

1 tsp. salt; 3 cups powdered sugar sifted with 5 tablespoons cocoa; 1 cup melted butter, mixed with 3 tablespoons honey; 6 teaspoons milk or cream; 3 teaspoons whipped cream.

Sift dry ingredients, add butter and honey mixed, stir in whipped cream, beating continually. This amount is sufficient for one large flat cake, or two layer cakes.

DESSERTS

Pumpkin Pie with Honey

1 1-2 cups pumpkin, 1 cup honey, 2 teaspoons cinnamon, 1 cup milk, 1 tsp. ginger, 1 tsp. salt, 2 eggs.

Mix ingredients in order given, bake in one crust. Garnish each piece of pie with a mound of whipped cream with honey in centre.

Strawberry Shortcake

3 cups sifted flour, 1 tsp. salt, 3 teaspoons baking, 3 teaspoons shortening, 1 cup milk; 3 teaspoons honey, 1 egg beaten very light.

Add the beaten egg and honey to the milk and combine as biscuit dough. Roll 1-2 inch thick. Cut in cakes two inches in diameter. Bake in hot oven about 25 min.

Strawberries

Use 2 cups of strawberries to one cup of mild honey. Mash the berries, add the honey and a pinch of salt and chill.

Honey Whip Cream

To each cup of whip cream allow two tablespoons of honey. Cream whipped with honey will stand up well and can be used for garnishing desserts, fruit salads, etc.

Honey Ice Cream

1 quart fresh cream, 1 cup delicately flavored honey. Stir the honey slowly into the cream. Mix well and freeze. No flavoring is required for this Ice Cream.

THE HUNTING INSTINCT

When the hunters sallied forth in the early hours of Monday morning and any other morning thereafter in search of feathered game it was in answer to that primitive instinct that always existed in the mental makeup of man.

Man has always been a hunter. Hunting was the principal occupation of primitive man. He ventured forth from the safety of his cavern home in search of meat for himself and family, and the game trails led him down many and varied paths of adventure and exploration. When the hunting was good—the trile was happy and prosperous, and when the hunting was poor the tribe suffered from the pangs of hunger, and the men went in search of new hunting grounds where game would be plentiful and life easier.

The lure of the hunt, the call of the game trail, is inseparably associated with the early history of man. It has left an indelible impression that, is still evident when the hawk of the wild goose or the squawk of the elusive duck is heard.

VIKING

The first two cars of new wheat were shipped on Monday by the Northern Elevator, one car belonging to Frank Slavik and the other to John Pratt. This was Gurnet wheat yielding 38 bushels to the acre and graded No. 2.

Duck hunting season opened with a bang on Monday morning. Some of the local nimrods report that ducks are quite plentiful in some parts of the district.

Mr. and Mrs. Basil Hilliker and daughter Miss Mary returned on Sunday from a motor trip that took them to Vancouver, Victoria, Banff, Billingham, Washington, and other points. On their trip which lasted over ten weeks, they saw many interesting sights and visited with several former Vikings at the coast. The trip was well worth while and they are all looking fit after their five thousand mile journey.

Mr. and Mrs. Geo. Wilson, of Park Rapids, Minnesota, arrived by motor last week and are guests at the home of Mr. and Mrs. J. J. Skalitzy, Minnesota was not favored with the rains that Alberta had this summer and the crops suffered considerably from lack of moisture stated Mr. Wilson. Although finding the roads quite muddy in places the trip to Viking was made without mishap in their Ford Coupe.

Born to Mr. and Mrs. F. Pico, a son on Friday, September 12th.

Dr. Little was a visitor in Edmonton for a few days this week.

Mr. and Mrs. S. Lefard have returned from a holiday trip.

The Shoppe-Rite Stores limited has had a new sign erected.

Several of our citizens are attending the air show at Edmonton today, Wednesday.

Miss Dorothy Sims of Viking arrived on Monday to resume her duties as teacher in Rosemary school—Chavuin Chronicle.

Messrs. Davis, of Chicago, Hanson of Winnipeg, and F. C. Wells, of Edmonton, all officials of the Swift Canadian Co. were guests at the J. J. Skalitzy home last week.

The Women's Institute will meet in the church hall on Thursday, September 18th at three o'clock p.m. Hostesses, Mrs. Hummel, Mrs. Skalitzy, Mrs. Clinton.

The federal government is appropriating \$20,000,000 for public works to relieve unemployment this winter. Well, there should be a postoffice building in Viking in that amount.

Harry Wadley south of town, states that he has three plum trees in his garden bearing fruit, on trees that were planted about three years ago. The variety is known as the Opata plums. Some cherry trees are also doing well and bearing fruit.

MISCELLANEOUS

Honey Baked Beans

Soak overnight one pint of small white beans. Bring to boil. Add baking soda the size of a bean and allow to simmer for fifteen minutes. Drain and cook until tender in salted water, but not long enough to break the skins. Drain and rinse the beans and place in an earthenware bean pot. Add 1 pint milk, 1 tsp. butter, 1 tsp. honey and a pinch of cayenne pepper. Cover closely and bake in a slow oven. These require several hours cooking, and it may be necessary to add a little water from time to time.

THOSE OMINOUS SIGNS

Soon a wreath of argent frost will appear—one morning on the garage roof and nature will lay the last of her summer garb away.

Then man will move to dig himself in for a new hibernation. There must be a day when windows will be opened wide while a miscellany of trash is burned in the furnace to start the winter fires blazing. That also will be the time for the motorist to consider the relative merits of various antifreeze concoctions.

Juvenile knees will presently go in to eclipse, socks will be supplanted by stockings, low shoes will give way to high ones and the less modernistic will don their winter flannels.

Between now and Thanksgiving turkey, there will be countless pleasant, thrilling excursions, with sun on arm, into forest and field. There will be for coats to be "thought" out of summer storage and thinner oil to be prescribed for the car.

When the first frost silvers the houseposts, and paints the leaves, man imperceptibly moves out of the open into the fireside chair, man's equivalent of the long sleep that sends bears to the cavern and hollow oak and moves the gardener to bed the hydrangeas down in straw.

TREES AND HEDGES

If trees and hedges and strips of sweet clover will help to stop soil drifting on prairie farms it is obvious that every farmer should go in for them. The loss from soil drifting on the prairie will this year, run into several million dollars, enough money, we think, to make a big start on changing the prairie farm from a treeless tract, to fields bordered by trees, by hedges, or by belts of sweet clover.

Drifting has become such a menace that it is plain that it will ruin hundreds of farmers if something is not done to check it. It has been demonstrated that certain methods of cultivation are useful in stopping drifting and it has also been shown that trees and hedges stop the force of the gale and keep the wind damage down to a minimum. This being the case it is apparent that the problem is not one that cannot be solved. Therefore it should be tackled. A visit to the Dominion forestry farm at Indian Head, Sask., will make it clear to anyone that trees, shelter belts and hedges do well on prairie soil if properly planted and cared for.

The suggestion may be made that it is easy for a government farm to grow trees owing to the fact that the Government has the money and the men to do the work. This, however, does not cover the whole situation. It is not a case of the man on the farm not being able to afford trees and hedges; it is a straight question of whether he can afford to be without them.—Saskatchewan Farmer.

BEVERAGES

Honey may be used to sweeten cocoa or fruit punch by simply adding it to the beverage instead of sugar.

Honey Lemonade

Use 2 tablespoons of lemon juice and 2 tablespoons of honey for each serving. Mix well together, add the cold water and ice and serve.

Honey Orangeade

6 tablespoons fresh orange juice. Two tablespoons honey and 1 tablespoon lemon juice to each serving. Mix well and add the cold water and ice.

Honey Vitality Cocktail

Yolk of 1 egg, juice of 1-2 lemons, juice of 1 or 2 oranges, 2 teaspoons of honey.

Beat these ingredients together and drink every morning.

CANDY

Divinity

2 cups white sugar, 1-3 cup honey pinch of salt, 1-3 cup water, 2 egg whites.

Boil the sugar, honey and water until the syrup spins a thread when dropped from a spoon. Pour slowly over the stiffly beaten egg whites and beat continually until the mixture thickens. Drop on a buttered sheet. This may be flavored with a drop or two of oil of peppermint.

Honey Fudge

2 cups sugar, 2 sq. chocolate (cut fine) 1-4 tsp. salt, butter the size of a walnut, 1 cup evaporated milk, 1-4 cup honey, 1 cup nuts.

Boil, sugar, chocolate and salt five minutes. Add honey and cook to a soft ball stage. Add butter cool. Beat until creamy. Add nuts. Pour on a buttered pan and cut in squares when cold.

Home Taffy

2 cups honey, 2-3 cups cold water, 2 cups sugar, pinch salt.

Boil water, honey and sugar together, until it forms a hard ball in cold water. Add the salt. Put on a buttered dish to cool. Then pull until white.

The Perfect Sport

"Why, Maggie, Ah thought you all was on your honeymoon. Wasn't you married, honey child?"

"Yes, Ah was married all right, but Gavage wanted to go to Memphis and Ah had been there before, so Ah let mah sister go in mah place."

YOUR PRINTING NEEDS

The News printing office is now in a better position than ever to attend to your printing requirements. A good quality of stock used on all jobs, and the printing is as good as you can get anywhere. We meet city prices, and in many cases are considerably lower, stock and workmanship considered. May we fill your next order?

Heard over the telephone: "Hello! Is this you really?" "Yes, I got out of the hospital this morning." "Isn't that too bad. I was planning to visit you there this afternoon."

LOUGHEED

On Friday evening at the home of Mrs. Archie Brown, E. R. Pedersen, acting as host, entertained forty guests at a farewell party in honor of Mr. J. F. Lougheed who is leaving shortly for Calgary.

The evening was spent at Whist, Dancing and singing. The honors in whist were as follows: Ladies first, Miss Verna Morrison; Ladies consolation, Mrs. Rowland; Gents first, Mr. R. L. Martin; Gents' Consolation, Mr. J. F. Lougheed.

Mr. Steen in a very pleasing manner presented Mr. Lougheed with a burnt leather album as a parting gift

from his friends of Lougheed, to which Mr. Lougheed suitably replied, expressing regrets in having to part with his many friends here.

Charles Claymont returned Saturday by motor, from Spokane, Wash. He will spend a few months here, where he formerly resided.

Norman Haddow, of Red Deer, is transferred to this branch of the Bank of Commerce, to fill the vacancy left by Fred Lornie.

Mr. and Mrs. Ort and two daughters left Tuesday for Coloma, B.C., where they will reside during the winter months.

POPULAR SUPERSTITIONS

Perhaps the oldest thing in the world is superstition, and although most of us have ceased to believe in omens there are many interesting "signs" that have come down from past ages. This new series will present some of the most common of these precepts.

Married in grey, you will go far away.

Married in black, you will wish yourself back.

Married in brown, you will live out of town.

Married in red, you will wish yourself dead.

Married in pearl, you will live in a whirl.

Married in green, ashamed to be seen.

Married in yellow, ashamed of you fellow.

Married in blue, he will always be true.

Married in pink, your spirits will sink.

Married in white, you have chosen aright.

Marry Monday for wealth, Tuesday for health, Wednesday the best day of all, Thursday for crosses, Friday for losses, Saturday no luck at all.

A January bride will be a prudent housekeeper and very good tempered.

A February bride will be a humane and affectionate wife and tender mother.

A March bride will be a frivolous chatter box, somewhat given to quarrelling.

An April bride will be inconstant but fairly good looking.

A May bride will be handsome, amiable and likely to be happy.

A June bride will be impetuous and generous.

A July bride will be handsome and smart but a trifle quick tempered.

An August bride will be amiable and practical.

A September bride will be discreet, affable and much liked.

An October bride will be pretty, coquettish, loving but jealous.

A November bride will be liberal, kind, but of a wild disposition.

A December bride will be fond of novelty, entertaining but extravagant.

The bride should never entirely don her wedding garments before the hour set for the ceremony as this is supposed to bring the worst of luck.

The would-be happy bridegroom also must never behold his bride arrayed in the wedding garments until he meets her at the altar.

The finding of a spider on the wedding gown by the bride is considered a sure sign of happiness to come.

THE EVOLUTION OF
HARVESTING MACHINERY

First was the bare hands that pulled the ripe grain. Then some genius invented the scythe which was followed by the cradle. Later came the mower and the reaper, machines that did the work of ten men. These machines were displaced by the binder, a machine that cut and bound the grain into sheaves in one operation.

For years the binder was the only harvesting device, but failed to fulfill all the requirements of the progressive farmer, for it left much hand labor to be done in stooking the grain after it was cut and bound. Inventors worked tirelessly on machines that were devised to stook the sheaves of grain and thus eliminate the costly operation of hand stooking.

chines, and with the introduction of the combine this idea has practically been abandoned. With the appearance of the small combine, a miniature of the huge machines that were used in harvesting the wheat crops in Kansas, the small combine has proved its worth in many districts of Western Canada. Together with the swather in districts that the grain does not ripen evenly it is rapidly taking the place of the binder and the threshing machine. The combine does the cutting and threshing in one operation, reducing the cost of harvesting and thus enabling the farmer to grow wheat and sell it at a lower price than he could before.

With the swather the cost is a little more as the cutting is done separately and the grain laid in windrows for ripening before the combine is used.

The combine is solving many of the problems of the western wheat grower.

In the adoption of mechanized farming, which seems inevitable, on a scale in which the power units are properly balanced with the area of land under cultivation, lies, it would seem, the salvation of the western wheat growing industry.

One of Mrs. Gillespie's beautiful paintings will be drawn for at the sale of work in October, also a delicious Xmas Cake made by Mrs. Clark. Further particulars later.

As a nerve tonic more effective than anything conceived by medical skill, Canada's rocky highlands and placid lakes were given first place by Sir William Dewart, M.D., F.R.C.S., interviewed recently at Lake Louise where he rested after attending the arduous convention of members of the British Medical Association held last month at Winnipeg.

A note of confidence and sincere optimism in the soundness of Canada's economic position at the present time and faith in her future development was sounded by E. W. Beatty, chairman and president of the Canadian Pacific Railway, at the banquet given recently at Saint John by the Board of Trade of that city in celebration of the first sailing of the Princess Helena, new C.P.R. coastal steamer, on the Saint John-Digby route.

Mr. Beatty said he hoped to see a second boat run alongside the Princess Helena in the not distant future.

Determination of the Canadian Pacific Railway to maintain for Canada the pride of owning the largest, fastest and finest ocean liner in the Pacific and the company's foresight in providing for needs beyond those of the present in the realm of transportation were lauded at Vancouver recently, at a dinner held aboard the liner Empress of Japan, near 26,000-ton Pacific vessel.

Hon. R. B. Hamilton, Minister, Lt.-Governor of British Columbia, added his tribute to those of nine other speakers at the function.

The old belief that the Red River fixes a charm upon those who touch it, was tried out recently as Harry Pearce, undefeated Australian flycatcher, stood on its shore and watched his son, H. R. Pearce, Olympic angler, cast a line, in a try out as a guest of the Winnipeg Rowing Club. Pearce is a contestant in the Empire Games at Hamilton next month.

NEWS AND VIEWS

KINSELLA DISTRICT

News and Views of Kinsella and District as Seen by Our Special Correspondent, J. J. Overbo.

Thom Skori pulled home from Kinsella a 28 inch Red River Special separator on Saturday afternoon. Mr. Holt has also purchased a new 22 inch Red River Special separator.

Owing to the heavy rain on Friday afternoon and Saturday the grain did not get in fit shape to thresh till Wednesday or Thursday of this week. Some threshing was done previous to the rain and was reported to yield up to 40 bushels per acre.

The first two carloads of 1930 wheat is now being loaded by the U. G. G. elevator at Kinsella.

Word has reached here that Mr. Hopper, Sr. is having critically ill in the Royal Alexandra hospital at Edmonton. Mr. Hopper was one of the early settlers in the district and until a few years ago when he and his wife moved to make their home in Edmonton, was residing on their farm north of town.

Thos. G. Dark, optometrist will be at the Kinsella hotel on Monday, September 22nd from 2 to 7 p.m. for professional services.

A few days ago Goodmood Erickson, a recent arrival from Norway, was taken to the Municipal hospital at Viking suffering from an attack of influenza. He is reported to be doing well.

Mike Sowiński has purchased half interest in the threshing outfit owned by Fred Green and is busy putting the outfit in good shape for this fall's work.

Johann and Lewis Overbo of Telfordville, Alta., is spending a few days visiting friends and relatives in the district. Johann recently underwent an operation at the Royal Alexandra Hospital in Edmonton from which he is regaining strength.

The regular monthly meeting of the Anglican W. A. was held in the Parish Hall, Thursday, September 11th. Hostesses, Mrs. Clark and Mrs. Walters.

At this meeting it was decided to hold the Annual Sale of Work on Saturday, October 25th and to meet every Monday for sewing party. All members and friends cordially invited to Mrs. Clark's residence next week.

September 22nd. A large number of workers assembled at Mrs. Walters last night, September 15th.

One of Mrs. Gillespie's beautiful paintings will be drawn for at the sale of work in October, also a delicious Xmas Cake made by Mrs. Clark. Further particulars later.

WORLD HAPPENINGS BRIEFLY TOLD

It is reported that Bernt Balchen, Norwegian flier who participated in the Byrd South Polar expedition, is planning a round the world flight.

Erastus G. Pearce, 60, vice-president and general manager of the Sherbrooke Daily Record, died at his home following a short illness.

Dieudonne Coste has been made an honorary colonel and Maurice Belhote an honorary lieutenant in the Mexican air force upon suggestion of the ministry of war.

Believed to be the oldest telephone operator in point of service in the United States, Miss Elizabeth Good, of St. Paul, Minn., has retired. She served subscribers 50 years.

Canada's term as a member of the Council of the League of Nations, has terminated. Sir Robert Borden, the Dominion's delegate, will now participate only in meetings of the assembly.

High praise was given to the equipment of Canadian sanatoria by Dr. F. J. H. Coult, tuberculosis specialist of England, who sailed from Montreal on the Canadian Pacific liner "Montcalm" for Southampton.

It is understood that officials of the British Empire Trade Exhibition were planning to ask the air ministry to send the dirigible R-101 or the R-100 to Buenos Aires, next March, for the exhibition there.

With a pledge given by the Latin bloc, which controls 15 votes in the assembly, to support Ireland, it becomes practically certain that the Irish Free State will succeed Canada on the council of the League of Nations.

Economic loss to the Dominion through unemployment is \$10,000,000 a month, Mayor H. W. Cater, of Brandon, Man., president of the Union of Canada Municipalities, stated at the opening of the 30th annual convention of that body at Hamilton.

Communist forces in China attacked British and United States gunboats. No fatalities were reported, though it was stated that the British boat's retaliation was the "heaviest attack against Chinese outlaws in recent years." It is thought that some members of the Red parties may have been killed.

GOVERNMENT GRAIN INSPECTION

We are indebted to the Searle Grain Co., Ltd., Winnipeg, for the following article describing the system of Government Grain Inspection as carried on under the supervision of the Board of Grain Commissioners. The Dominion Government Grain Inspection Department is under supervision of the Board of Grain Commissioners, but the direct responsibility for the actual grading is placed upon the Chief Inspector for Canada and his deputies. These men are efficient, of high integrity and have had many years of experience.

The necessary qualities of a Grain Inspector are sound judgment, accuracy and a thorough knowledge of grain, as well as a general knowledge of the many different varieties and their respective milling values.

A good light is essential to grading. The Inspection Department always uses a north light there is no glare from the sun, and a north light is always steady. The actual grading is never done later than 4:30 in the afternoon, thus utilizing the light while it is at its best.

After the samples are taken from the railway cars as described in our pamphlet "Government Grain Sampling," and have been delivered to the Grain Inspector's office, the first step in grading is weighing the samples to ascertain the test weight per measured bushel. Then the dockage is determined by weighing 500 grams (approximately a pound) of grain, sieving it and weighing the refuse or "dockage" which has been screened through the official standard sieves for that purpose. The test weight and dockage are recorded on the cardboard ticket contained in each sample bag. The Inspector then grades the cleaned grain, placing grade and dockage on the "Inspector's Sheet," making notations regarding the quality, test weight and the load lines of the car. The samples are then checked and passed on by the Supervisors as to accuracy of grade, and thus double checked.

The inspection sheets are two in number, a larger and smaller. The larger sheet shows the full details of the car numbers, station shipped from, destination, and to whom cars are consigned; the smaller carbon copy sheet, called "Inspector's Sheet," only bears the car numbers—thus the Deputy Inspector does not know where the car he is grading is from or who owns it; each individual sample is graded on its own merits. After the Deputy Inspector has graded a sheet the larger and the smaller sheets are put together by the clerical staff, grades are filled in, checked, and from the larger sheets, the Inspection Certificates are made up. Each day copies of the inspection sheets are sent to the Government Grain Inspection offices at terminal unloading points to be used for binning purposes.

The most important of the mechanical aids used by the Inspectors are sieves, wild out separators, scales and moisture testers. The sieves used for cleaning wheat are the No. 10 wire sieve and the No. 5 zinc buckwheat sieve. A Cowan dockage tester is used for separating wild oats and an Emerson dockage tester is used in the case of durum wheat. A No. 6 wire sieve is used for cleaning barley. For flax two sieves are used: the top sieve is a 20 by 6 wire sieve, while the bottom sieve is of zinc with 41.61 round perforations. The imperial quart kettle is used for determining the test weight per measured bushel. The moisture tester (Brown-Duval type), is the most intricate of these and is operated as follows: 100 grams of wheat are put into a glass flask with 150cc. of oil. (The oil prevents the wheat from burning.) A thermometer and a tight fitting rubber cork are inserted in the top of the flask and from the side of the flask is a spout which fits into a long glass condensing tube submerged in a tank of running cold water. Underneath the condensing tube is a graduated glass cylinder into which the moisture condensed from the grain falls. When the thermometer registers the prescribed temperature of 180 degrees the heat is turned off, moisture tester allowed to cool, and the percentage moisture in the grain is read from the graduated glass cylinder.

Before each Deputy Inspector are minimum standard samples of the different grades which are for his guidance. These standard samples are made up each fall for the new crop as early as possible by the "Western Grain Standards Committee." This Committee is made up as follows: One miller's representative, four representatives of the Producers of Alberta, five from Saskatchewan, three from Manitoba, one from British Columbia, the

If a shipper is dissatisfied with the grade placed on his car he has two recourses to register protest, first he can call for a reinspection of the unload sample for which there is no charge. If the grade is not raised and he is still dissatisfied, he can have the unload sample placed before the Grain Appeal Tribunal, whose decision is final. The fee for an appeal is \$3.00. If the grade is raised the fee is returned, and if the Inspector's grade is sustained the fee is forfeited.

Appeal Boards in the Western Division are situated at Winnipeg, Calgary and Edmonton. Each Board consists of eight members, including the Chairman, who is an independent salaried official. A quorum of an Appeal Board or Tribunal consists of the Chairman and two other members, one of such members to be a representative of the Producers.

The Western Inspection Division is all territory from the Pacific Coast to the Head of the Lakes. In this territory are several inspection points, namely, Fort William, Port Arthur, Winnipeg, Moose Jaw, Saskatoon, Calgary, Edmonton, Medicine Hat, Prince Rupert and Vancouver. Approximately 130 inspectors are employed under the Chief Inspector.

There is also a large research laboratory in connection with the Inspection Department at Winnipeg. Its duties are to determine the milling and baking qualities of wheat and also to make protein and moisture tests as well as a general research work for the guidance of the Western Grain Standards Committee and the Inspection Department.

Our management pays careful attention to the grading of all cars consigned to our advice. The inspection certificate is compared with advice from the shipper as to grade anticipated, the official Government sample of the car is carefully examined in the Inspector's office and the shipper's instructions are carried out. Whenever we consider any better grade obtainable by a re-inspection it is ordered on the unload sample and if necessary we ask for an appeal.

New Device Demonstrated

Music Produced From Instrument Based On Radio Principles

By merely moving his hands before a plain looking cabinet, Lenington H. Shewell, a national broadcasting artist, created music of such amazing tone and beauty that radio engineers from all over America, who heard him, applauded enthusiastically.

It was the first public demonstration in Toronto of the Victor Thormin, a musical instrument based on radio principles, which had been brought here for the annual banquet at the King-Edward Hotel held in connection with the fifth annual and "the first international convention of the Institute of Radio Engineers."

The music of the instrument had been heard by many before on national hook-ups over the air, but more novel than the actual music was the simplicity with which the young artist seemed to produce it. Standing before a silvery rod which extended above a plain wooden box, Mr. Shewell merely moved his hands back and forth to bring out the tones he desired. His right hand was used to bring out the melody, he explained later, and with his left hand he controlled volume, phrasing and expression.

The Thormin is named after its

creator, a Russian, who conceived the idea that in the "squeals" of radios was sound that could be utilized as music.

A study looking into causes of street car and bus traffic accidents showed that more than 20 per cent. of the street car and bus operators are "prone-to-accident" men.

An Aviation Mecca

Canada Is World's Best Testing Ground For Aeroplanes

Canada is the world's best testing ground for aeroplanes, as they are given year-round use under varying conditions on wheels, on floats and on skis, said Ernest Robinson, vice-president of the Fairchild Aviation Corporation, in opening the new Canadian factory and aerodrome and seaplane base at Longueuil, Que.

The new plant, which was constructed to turn out Fairchild planes for Canadian use, is expected to turn out about 150 Fairchild planes a year.

A philosopher of the fourteenth century has left it on record that "Most men have three characters—that which they do exhibit, that which they have, and that which they think they have."

The Atlas moth, a night flying insect of Central America, is one of the largest insects in the world. Its wings measure 14 inches from tip to tip.

A new dress material is said to be made from steel. Artificial teeth for moths will be the next thing.

Birthplace Of Canada's Premiers

Eastern Provinces Will Not Always Have This Distinction

It is a curious fact (but after all not so curious when the comparative "newness" of the Canadian West is borne in mind) that no premier of Canada has been born west of Western Ontario, where Mr. Meighen "suffered." Mr. King by a few miles in his nativity.

Indeed until Mr. Meighen took office in 1920, no premier had been born west of Quebec. And with Mr. Bennett another easterner takes office—the first New Brunswicker to become prime minister, although Nova Scotia had given Canada Thompson, Tupper and Borden.

The list of Canadian premiers is an interesting one and indicates a wide range of religious beliefs as well as a diversity of nationalities. It is as follows:

Sir John A. Macdonald—a native of Glasgow-Scotland; an Anglican.

Mr. Alexander Mackenzie—a native of Perthshire, Scotland; a Baptist, although his relations with the Presbyterian church, in which he had been brought up, were always very close.

Sir J. J. Abbott—a native of Argenteuil, Que.; an Anglican, the son of an Anglican clergyman.

Sir John Thompson—a native of Halifax, N.S.; a Methodist, who later became a Roman Catholic.

Sir Mackenzie Bowell—a native of Suffolk, Eng.; a Methodist.

Sir Charles Tupper—a native of Amherst, N.S.; an Anglican although his father was a Baptist minister.

Sir Wilfrid Laurier—a native of St. Lin, Que.; a Roman Catholic.

Sir Robert Borden—a native of Grand Pre, N.S.; an Anglican.

Mr. Arthur Meighen—a native of Perth, Ont.; a Presbyterian.

Mr. W. L. M. King—a native of Berlin (Kitchener), Ont.; a Presbyterian.

Mr. R. B. Bennett—a native of Hopewell, N.B.; United Church (Methodist).

That is the list to date, but somewhere in Western Canada there is doubtless some lad or young man, or perhaps even a mature man, who, a native of that never Canada, is destined some day to lead a political party to victory. Time will reveal him.

"I never knew until I got a car," said the bishop, "that profanity was so prevalent."

"Do you hear much of it on the road?"

"Why," replied the bishop, "nearly everybody I bump into swears dreadfully."

An individual's heart contains among other substances, copper, silver and aluminum.

Of course air travel isn't safe. Why should it be an exception?

How To Lose 24 Pounds of Fat

At the Same Time Gain in Physical Vigor and Youthfulness and Swiftly Possess a Clear Skin and Vivacious Eyes that Sparkle with Health.

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness that every woman possesses.

Every morning take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast. Be sure and do this every morning for "It's the daily dose that takes off the fat."—Don't miss a morning. Kruschen daily means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system. Modify your diet, and take gentle exercise. The stomach, liver, kidneys and bowels are turned up, the pure, fresh blood containing these six salts is carried to every part of the body, and this is followed by "the Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

Not Cramped For Space

Accommodation On R-100 More Commodious Than On Trains

When the British air liner R-100 was over Ottawa, it was difficult to realize that the ship's weight in the air is actually over 150 tons. Its length R-100 is larger than any of the ocean liners that sail out of Montreal. The airframe to house R-100 would have to be larger than any city block in Ottawa.

Passengers on the air liner have cabins as commodious as the cabins on ocean liners. They are larger than the compartments in Pullman sleeping cars. There is more room on the promenade decks of R-100 than in the observation cars of transcontinental trains. The dining saloon will accommodate more passengers than will the dining car of any train.

Under construction, when the long steel girders of the airship were to be seen, it conveyed an impression of strength much like the appearance of an ocean liner in the shipyard. Long before R-100 has reached the present age of the British liner, "Mauretania," first class passenger travel will be almost entirely by air.

Royal Winter Fair

The Royal Winter Fair at Toronto this year will be held from November 19th to November 27th, both dates inclusive. The association has recently opened new and larger offices in the Reford Building, the change being made necessary by the expanding business of the association.

ELIOS "FRUIT SALT"

Mothers! Don't Risk Their Health With Violent Purgatives

Constipation is one of childhood's greatest enemies. Unless the intestinal system is kept clear and clean, ill health is almost sure to follow.

But severe acting laxatives are dangerous. The bodily system of child or adult is not meant to withstand the unnatural, forcing action caused by ordinary, cheap cathartics.

ELIOS "Fruit Salt" in a glass of water, every morning is the safest, surest and most pleasant way to inner cleanliness and perfect health.

CHAPTER XXIX.—Continued

But Jim Bennett suddenly pushed between them. "Clear out," he commanded brusquely, with a nod at the door marked "Private." This was the president of the Wickfield National Bank ejected from his own quarters. He went peacefully, but not before he had seen something that caused him to blow his nose with exceeding violence as he closed the door. Charman was weeping, her tears soaking the shoulder of Jim's new suit.

"You promised not to cry, dear," Jim reminded her after an interval. She stirred, as if to move away, but his arms held her so relentlessly that she relaxed and said, not raising her eyes: "I'm terribly ashamed to give way like this, Jim. But—but I felt so homeless all of a sudden."

Her voice trembled with heart-break. Jim couldn't stand it. "Don't say that, Charman," he cried, his own voice shaking with distress. "Why've you got that precious little grandmother, and—and me—any time you'll say the word."

Under the new coat she felt his heart race, as hers was racing. It gave her courage to ask shamelessly: "Then—then—aren't going to be married, after all?"

"Not unless I marry you, sweetheart," he answered.

Sweetheart! Was this her inarticulate Jimmy? Charman didn't know his voice could sound like that. For a moment she forgot the homelessness that had brought her tears—forgot everything in the sense of relief that flooded through her as she gasped: "Then there isn't a girl in California, as Miss Lizzie said?"

Jim smiled, thinking how innocent his mother had played into his hands. His arms tightened as he answered:

When BABIES are Upset

BABY ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

**Fletcher's
CASTORIA**

W. N. U. 1855

As Jim talked he had reached for the newly signed deed and was slowly turning it into a slip of paper. Charman's fascinated gaze. It was this that caught George K's eyes when, after a considerable rattling of the doorknob, which passed unnoticed, he returned to his own domain.

"What in the name of Sam Hill are you doing?" he demanded with a glance at the wretched basket of paper which Jim had dropped the fragments. "Have you backed out of your bargain at this late date?"

"Yep," replied Jim happily, "but I made another—promised to love, honor, and obey, you understand. Sorry to have caused you all this trouble, Uncle George, but it would be rather foolish to have this paper recorded and then, a week or so later, deed the place back to my—my wife. I think you'll agree to that."

The president of the Wickfield National Bank sank slowly into his worn leather chair. "Jim," he announced, shaking his gray head, "when it comes to picking out a wife, you've got more horse sense than my three boys put together. As for Charman, it's my opinion that she might do worse, considerably worse. But—"

"Uncle George," broke in Charman reproachfully, "you said that the man who wanted to buy our house was some one who had driven by—and—"

"Well," interrupted the banker with a wink, "I don't know any one who's haunted your vicinity more than Jim has!"

"You said," went on Charman, still reproachful, "that he was going to be married, and—"

"What's wrong with that statement?" demanded George K., smiling. "You haven't the heart to let him vegetate into an old back like Sam Gardfield, have you?"

Jim made an unsuccessful effort to suppress a grin, and said: "I'd no idea you were such an accomplished liar, Uncle George; but as I drove you into it I think we'll have to forgive you—that is, if you promise not to let it happen another time."

"Dear out, both of you," commanded George K. briskly. "I'm going home this minute and tell Salina: I'm expecting a man from Portland on the eleven-ten, but he'll have to wait—darned if he won't! I haven't been so happy since I got word that I was a granddad. Run along, I'm in a hurry." Then, as the young folks reached the door he added: "Charman, haven't you forgotten something, my dear?"

Charman laughed, came back, and said as the president of the Wickfield National took her in his arms: "I was wondering if you'd let me go this time without a kiss!"

CHAPTER XXX

It was twilight, and Grandma Davis sat by the window, living over every hour of the day that was drawing to a close. She had been in a sort of blissful daze from that moment when Charman and Jim Bennett had burst in upon her, the girl sinking down at her knee as she had always done in childhood when there was anything wonderful to tell. Sometimes it was merely the arrival of the first circus, or news that the baby bluebirds in the apple tree were trying their wings. Sometimes it was the prospect of an unexpected treat; a coming circus, perhaps, or a Sunday School picnic—but it was here at Grandma's knee that all glad tidings were poured out. Yet, though the old lady, catching her breath sharply at its beauty, never before had such radiant shone from the girl's face.

"You'll never have to leave the old house, Grandma darling," she was saying tenderly. "Thanks to this blessed Jim it's ours forever and ever, amen."

Grandma looked up at Jim, then back at Charman. She did not say that with some strange sixth sense she had known when they left her that Charman was on her way to sign the deed. It had been a bitter hour for Grandma, waiting there in silence with her memories; and now she asked, not seeing the way quite clearly: "You mean, dearie, that you've sold the house to Jim?"

The young man came closer, smiling down upon her.

"That wasn't necessary, Grandma. Can't you guess why?"

His eyes met Charman's in a glance that needed no interpretation, and Grandma cried: "You mean she—she's taken you, Jimmy? She's really taken you?"

Jim laughed, softly.

"Incredible as it seems—she has!"

"And you're not doing it just for pie, dearie?" Grandma's wrinkled

face bore a strange mingling of joy and fear. "That wouldn't be fair to Jimmy, Charman. He deserves the best. You mustn't cheat him even to keep my heart from aching. You're not doing it just to get the house?"

Newspaper Influence

Press of Today Is Becoming More Independent

Writing in *Nation's Business*, Gamaliel Bradford draws a striking picture of achievement during the nineteenth century, and among other developments he points to the rise of the modern newspaper. "When we compare the newspaper of a hundred years ago with that of today," he says, "we appreciate the immense social influence that has been exerted in every phase of human affairs." Quite true. Perhaps no other factor of civilization has been more potent. The newspaper of today epitomizes human evolution. It is the chief avenue of current thought. It touches life at nearly every angle. It has not only kept in step with every aspect of social and economic progress, but the truth must be frankly recognized that it has, on the whole, displayed capable leadership. It has stood for worthy ideals.

All newspapers were once fiercely partisan, and a general election was not necessary to tell us that many are still so. But the drift has been toward relative independence. An uncompromisingly partisan journal is precisely like an uncompromisingly partisan individual, in the sense that it sees but one side of an issue. There are unusual two sides. As the process of evolution proceeds, we are likely to see less of superheated and unreasoning partisanship among at least the leading newspapers. How much of genuine influence was exercised by the press of Canada in the recent general election no one may say; but it was undoubtedly considerable. This means responsibility as well as opportunity; and, speaking broadly, that spirit of trusteeship over public opinion is growing. It has immense and promising implications.

Recipes For This Week

(By Betty Barclay)

PEAR AND APPLE CONSERVE

- 1 pint diced pears.
- 1 pint diced tart apple.
- 1 lemon, juice and grated rind.
- 1 cup seedless raisins.
- 1 cup English walnuts.
- ½ cup sugar.

Wash the raisins and steam them for 30 minutes. Add to the other ingredients and cook the mixture until it is thick and clear. Turn it into clean, hot jelly glasses, and when it is cold, cover it with melted paraffin. The nuts may be omitted, or a small amount of preserved ginger may be added.

APPLE TART

Use tart apples that are barely ripe or slightly underripe. Wash and cut the fruit in slices about ½ inch thick, leaving the peels on. Add water to cover, about 2 cups to each pound of fruit. Cook 15 or 20 minutes, or until soft. Strain through a cheese-cloth bag and then through a flannel one. Add ½ cup sugar to each cup of apple juice, or ¾ cup sugar to each cup juice of moderate acidity. Boil to the jellying point and fill glasses.

Says World Through With War

Frank B. Kellogg Thinks Public Opinion Will Make It Impossible

In an interview with Edward Price Bell, in the *Daily News*, the other day, Frank B. Kellogg affirmed that in the civilized world "public opinion is finished with war." Armed strife, therefore, he considers to be most improbable.

The tension between Italy and France, the recent German attacks upon the Versailles treaty, and other somewhat disquieting occurrences do not disturb Mr. Kellogg. He believes that formidable legal barriers to jingo recklessness have been erected in Europe, and that belligerent politicians appealing to prejudice and fear will find the barriers insurmountable because of the moral forces behind them.

Minard's Liniment is a household friend.

Idea Not So Good

The witness was certainly no chicken, and the young barrister thought it would be to his advantage to get her rattled.

"And now, madam," he said, "I must ask a personal question. How old are you?"

"Young man," she replied, "it isn't more than an hour since the judge, there, objected to hearsay evidence. And I don't remember being born, and all I know of it is hearsay."

CANADIAN PACIFIC STEAMSHIPS

Cruise Ocean in Open Skiff

Boy and Girl Make Trip From Bermuda To New York

Eric Johnson, 21 years old, and Florence Smith, 24, of Warwick, Bermuda, arrived at the army base pier in Brooklyn recently, after a 17-day trip from Bermuda in an open skiff. The trip in the 15½-foot boat which Johnson himself built several years ago, started when he and the girl decided, as they were sitting on the beach, to go for a ride. The ride finally developed into a trip to Nova Scotia where Johnson has relations. Neither had any knowledge of navigation, the only nautical instruments they had was a small pocket compass. Knowing that the direction to New York was northwest in general, they kept the skiff headed in that direction with the aid of the compass.

Two days from Bermuda the sail which the small boat carried knocked Florence out of the boat. Though she could not swim and found herself surrounded by sharks, she managed to scramble back into the skiff safely.

With the exception of two days of bad weather, the trip was made under ideal conditions, and they finally arrived off Barnegat Bay light. Johnson hailed the lightsman and verified his position before continuing on to New York.

Two days from New York, the two voyagers were found by the superintendant, Walter Bernard, who took them to his home and supplied them with food and clothing.

William King, immigration inspector, went to see them at Bernard's home and they explained that they knew nothing about quarantine regulations. As they were only stopping in New York on their way to Nova Scotia, King let them go after an examination at the barge office.

A Dream Of Utopia

When Men All Over the World Will Work But Three Days a Week

At High Wages

Prediction that men in the future all over the world will work but three days a week and be paid high wages, was made by Sir William Jovitt, Attorney-General of England, who with a group of distinguished European jurists visited Baltimore recently.

The Englishman said there will be ups and downs in the world-wide economic situation, but no permanent recovery until that time.

Sir William, who has been an outstanding member of the Labor Government since 1929, placed a share of the blame for England's unemployment situation on the Wall Street crash last fall.

Speaking of the English situation, he said: "I believe the upturn is coming, and that England will be among the first to recover."

"The upward trend in the immediate future will result from depletion of stocks of goods turned out in the past and at a rate faster than that of world consumption, but the permanent cure will not come until there has been some adjustment," he said. "I believe that men all over the world eventually will work but three days a week, but will be paid high wages in order that they may consume the goods they produce."

A newly perfected machine for washing railroad cars can be operated by five men and cleans 100 cars in an eight-hour day, whereas until recently five men could clean only about four cars in that time.

Minard's Liniment for Cuts and Abrasions.

Little Helps For This Week

"Let us not be weary in well-doing, for in due season we shall reap, if we faint not."—Galatians vi. 9.

He liveth long who liveth well.
All else is life but flung away.
He liveth longest who can tell
Of true things truly done each day.

Then fill each day with what will last.
Buy up the moments as they go:
The life above when this is past,
Is the ripe fruit of life below.

—Horatius Bonar—
It is the care of the wise and good man to look to his manners and actions, and rather to how well he lives than to how long; for whether he shall die sooner or later is not his business; but whether he shall die ill or well—Seneca.

B.C. Coal For Peru

Trial Shipment Of Coal From British Columbia Goes To South America

An initial shipment of coal from British Columbia has been sent to Callao, Peru, where it is being favorably received. In the past, Great Britain supplied 75 per cent. of the 30,000 tons required by Peru annually, but owing to some extent to the New South Wales coal strike and to the depressed shipping conditions on the North Pacific, Canada has been able to invade this market.

The first automobile was unknowingly built in 1804, when Oliver Evans put wheels on a steam dredge and drove it two miles under its own power.

Rubber overshoes, laced over the forward edge of the wing, have been devised to keep airplanes free from ice.

Measurement of the speed of earthquakes proves that the earth inside is rigid and not liquid.

Picture of Health Now

"In May and June I was badly rundown and had faint spells until it was a drag to do my work. In July and August I didn't seem to pick up so I decided to try Lydia E. Pinkham's Vegetable Compound because I saw it advertised. I took two bottles and now I am the picture of health. I feel fine, do all my work and milk two cows. If any woman writes, I will certainly answer her letter."—Mrs. George R. Gillespie, Puncheon, Saskatchewan.

New Gas Electric Engine

With its eight-cylinder gasoline engine and two electric motors putting and humming in soothing but powerful harmony No. 47, the Canadian Pacific Railway's new gas-electric combined passenger and baggage car, embodying the latest developments in electro-motive traction, travels between Hamilton and Goderich and its sister car No. 46, between

ROBERT ENGLAND, who has been appointed Western Manager, Department of Colonization and Agriculture, Canadian National Railway, Winnipeg. He succeeds J. S. McGowan, who has been promoted Assistant Director of the department at Montreal.

Ottawa and Waltham. These cars have a range of 400 miles at an average speed of 30 miles an hour, but attain a maximum speed of 65 miles an hour. They comprise a first-class compartment seating 36 passengers, a smoking compartment for 15 people and a 17-foot compartment for baggage and express.

Main Street

Mr. A. G. Walker of Calgary is in Irma on a business trip.

Mr. and Mrs. Lyle, formerly of Irma were visitors in town last week.

Several cars motored to Edmonton for the air meet. Among them were Elford's, Tripp's, and Sanderson's.

Miss Mary Wilson who has spent a month with her sister returned to Edmonton Wednesday.

The Ladies Aid will meet at the home of Mrs. James Fenton on Thursday, September 25th.

E. W. Carter made a business trip to Edmonton the first of the week.

Mrs. N. W. Frickleton spent a few days in the city this week.

Mrs. Schornert has gone for a vacation to her old home at Bow Island, Alberta.

Miss Margery Locke had the misfortune to sprain her ankle and had to return home from attending Normal school in Edmonton.

Ladies Aid Tea and Shower, Saturday afternoon and evening, October the eleventh.

The Ladies Aid Bazaar will be held on November 1st.

The tea and shower for the benefit of the Bazaar will be held at the Maase on Saturday, October the eleventh.

October 1st has been set aside by the provincial town and rural planning advisory board as "Peony Day". Societies interested are asked to take notice.

THE VALUE OF HOME GROWN GRAINS IN POULTRY FEEDING

(Experimental Farms Note)

The value of imported feeds used in poultry rations runs into millions of dollars annually. Of these feeds, corn and corn products make up a large proportion and represent one of the higher priced grains used in poultry feeding work.

The saving in money and time which could be attained should this importation be greatly reduced by the use of barley, a grain grown almost universally in Canada, in place of the more expensive corn product needs no elaboration.

At the present time corn products make up from twenty to thirty per cent of the scratch grain and mash mixtures commonly used with as high as 70 per cent in certain types of all mash rations which are used considerably in the United States and have been in some cases recommended for use in this country during the past few years.

In view of these facts, the poultry departments of several Dominion Government Experimental Farms and Stations in almost all provinces of Canada have been carrying on experiments for a few years past in an endeavor to ascertain the comparative value of barley and corn in poultry rations.

In the experiments under consideration the Experimental Farm concerned substituted barley for corn on a pound for pound basis in almost every instance.

The results of this work covering periods of six months duration and repeated each year for three and four years in some cases, are interesting. With one or two exceptions only, barley proved more efficient than corn for egg production producing almost as many or a greater number of eggs and on account of the low cost of the home grown grain, at a greater profit per bird over the cost of feed. In one instance hulled oats in contrast to corn also gave more economical production. In the few cases in which corn was superior the difference was slight on the average.

It must be borne in mind that where barley was used in place of corn care was taken to otherwise supplement the ration with foods well fortified with certain vitamins in which barley is lacking. In most cases the supplements used were green alfalfa or clover or the dried leaves and blossoms of these plants and crude cod liver oil, the last mentioned fed usually at the level of one percent of the mash consumed.

Although considerably more experimental work along this line is required before the value of this grain as a substitute for corn can be accurately understood it would appear from the results so far obtained that barley may substitute for corn in poultry feeds for egg production to a considerable extent. In those localities where corn products are difficult to obtain and high in price the above statement would particularly apply.
